

Inspiration in {bold, lustrous} color.

The highest quality—and greatest care—guaranteed. From our hands to yours. Each and every Vintaj Natural Brass Co. finding and filigree undergoes a meticulous, 7-step hand-embellishing process. We're proud of the unique and artistic nature of the stages we apply and the time it takes to bring you these naturally beautiful elements.

Quality & Inspiration

- Find your creative inspiration in Vintaj® 100% natural brass findings, filigree, beads, charms and chain. No matter what your style, your beads will take on a whole new dimension with these artful elements.
- A rich, distinctive color (*identical to vintage brass*), intricate detail, fine-lined etching, and bold, raised-relief design are just a few qualities of these unique findings.

Natural Beauty

- Our process is eco-friendly, enhancing the natural beauty of the brass, and is safe for your treasured beads.
- Vintaj products are not antique plated or chemically treated. They are nickel free and lead-free compliant.

From Our Hands to Yours

- We hand embellish each and every finding to achieve their rich quality before they reach your hands.
- Due to the careful, hand process used on each Vintaj piece, every finding has its own unique color and luster. It is the subtle differences in color that give our findings such depth and dimension.

Care

- A mild soap and water rinse is all that is necessary for product care.
- For a rich, brilliant luster we recommend MAAS Metal Polishing Crème. To achieve this added brilliance or to highlight raised relief areas, simply “wipe on and wipe off.”
- For an added protection, we recommend Renaissance Wax. It forms a durable, lustrous protective coating which guards against humidity, heat, dust and ordinary wear.
